### Course Description:

Riders can expect to find one of the most fun, perhaps funnest, courses of the MWCCC season. The course is located in the heavily glaciated portion of Wisconsin known as the Northern Kettle Moraine. Approximately 15,000 years ago when the glaciers melted away their melted ice/water flows deposited all the sand and rock they had accumulated when they advanced. The resulting land forms are still with us today. The region is dotted with small up-hills, down-hills, flat-parts and lakes. Luckily for us the course is only on the up-hills, down-hills and flat-parts.

The roads are windy and depending on the wind, windy. (Think about it...) Most riders should be able to handle the hills with a 12-25 cassette.

The road surface is in good condition. All riders will be expected to ride on the right/correct side of the road. The yellow line rule will be enforced!!

There are two right-hand turns, one left and then one more right. Corners will be marshaled but please be cognizant of traffic as the roads are open to the public.

The finish is at the top of the largest hill on the course, located about 1km from the parking lot.
